ALPHASHOT XXL

ALPHASHOT XXL is an innovative all-in-one product imaging system that replaces a photo/video studio. Designed for mid-sized to big objects it is perfect for shooting products such as apparel, home appliances, tools, furniture and many others.

ALPHASHOT XXL enables to produce still and 360° images and videos.

ALPHASHOT XXL features large, adjustable and dimmable LED lighting that ensures proper colour reproduction and lightening of various products. Back and bottom lights enable to automatically produce pure white background images or video.

The key element of ALPHASHOT XXL is ALPHASHOT EDITOR software, which makes it easy to operate the device by non-professionals. Thanks to template based workflow once setup image configuration can be repeated forever.

TYPICAL USE:

APPAREL

MODELS

HOME DECOR

APPLIANCES

BAGS

FURNITURE

ALPHASHOT XXL

FEATURES:

2D

360°

Still and 360° image capture

Captures still and 360° images of items with background automatically removed.

Video

Captures video of model or product on pure white background.

Example video

Automatic background removal*

Graphic designer no longer has to spend time removing background, ORBITVU will do it for him instantly.

**Does not remove background in videos and pictures of models.*

High end LED lighting

2mt high, dimmable LED lights, featuring outstanding color reproduction (95+ CRI).

Image consistency

Template based workflow: setup once, repeat forever.
